UI Analyzer

Pre-visit

My Awesome Block

My awesome block is a block that...

My awesome block is a block that...

Code Specialist

```
function my_block_init() {  
  register_block_type(  
    'my/awesome-block',  
    array(  
      'render_callback' => 'render_block',  
    )  
  )  
}
```

PR Summary

+128 -12

- Improved block logic
- Added error handling
- Better performance
- Docs updated

Workflow Orchestrator

- ✓ Analyze
- ✓ Plan
- ✓ Build
- ✓ Test
- ✓ Document
- ✓ Deploy

THE WORDPRESS WAY

BLOCK EDITOR HANDBOOK

PHP for WordPress Developers

DESIGN SYSTEMS

AI-POWERED ENGINEER

NOT JUST PROMPTING. ENGINEERING.

CODE BUILD REPEAT

The Prompt-and-Repeat Loop

Typical non-agentic workflow:

- “create me a custom Gutenberg block”
- AI returns generic React code
- developer re-explains block.json
- re-explains render.php
- re-explains theme conventions
- re-explains metafields fields
- retries again

**This is still prompt babysitting,
not true delegation.**

The Real Shift: From Prompting to Delegating

Traditional AI Use = Prompt → Answer

“build me a Testimonial Slider”

Agentic Use = task → context → workflow → execution

“ build this using our building blocks skill and AGENTS.md standards”

TRADITIONAL AI PROMPTING

CHAOS. REACTIVE. EXHAUSTING.

-ADD A HERO SECTION

MAKE IT IT MODERN.

WHY IS THIS WORKING?

FIX THE LAYOUT WORKING?

CHANGE IT RESPONSIVE?

CAN YOU FIX THIS?

BROKEN LAYOUT

MISSING STYLES

CONFLICTING CODE

```
<div class="m">
<?php
// What is happening?
function broken() {
return false;
}
?>
```

Can you make the hero bigger?

Sure! Here's the updated code...

It broke the layout.

Can you fix it?

Here's another version...

Now the header is broken.

Why is this so hard?

Message AI...

PROMPT AGAIN... AND AGAIN...

ERRORS

STRUCTURE > PROMPTS

THE REAL SHIFT:
NOT BETTER PROMPTING.
STRUCTURED DELEGATION.

AGENTIC DEVELOPMENT

STRUCTURED. DELEGATED. SCALABLE.

MISSION ACCOMPLISHED

Modern. Fast. Accessible. Built the WordPress Way.

Innovative WordPress Solutions

Powerful blocks. Clean code. Exceptional results.

What Makes an AI Agent Actually Productive?

A productive coding agent needs:

- 1. Project Memory**
- 2. Reusable Skills**
- 3. External Tools**

1

PROJECT MEMORY

Context. Rules. Standards.

AGENTS.md

Layer One:

Project Memory with AGENTS.md

- **This is a WordPress block theme**
- **All custom blocks live in /blocks**
- **Dynamic blocks require render.php**
- **Use metadata registration only**
- **Use WP coding standards**
- **Never modify vendor assets**
- **Run npm run build**

DO NOT
PUSH TO MAIN 

render.php
required

Run
npm build

Follow
block
standards 

Never
touch
vendor/ 

Respect
coding
standards 

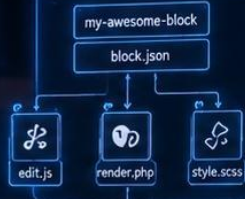

Understood!

WORK.

Why This Matters Beyond Developers

Without project memory:

- **More retries**
- **More supervision**
- **inconsistent outputs**

With project memory:

- **repeatable execution**
- **less explanation**
- **more predictable delivery**

A January 2026 empirical study found that repositories using concise human-written AGENTS.md files showed:

- ~28% lower median runtime**
- ~16% lower output token consumption**

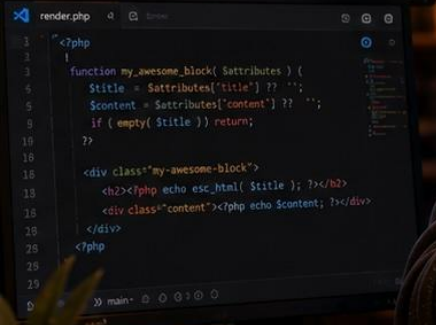

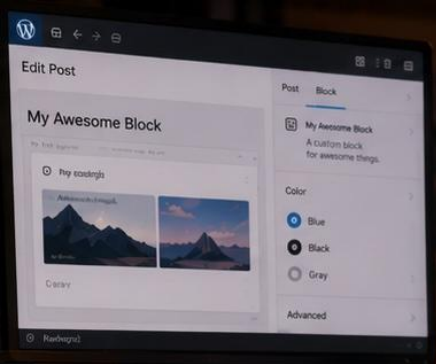

during coding agent execution.

Layer Two: Reusable Skills

Skills package workflows into reusable modules.

Examples:

- Build Dynamic Gutenberg Block**
- Register Interactivity API Store**
- Create Metafield Group Mapping**
- Generate PR Summary from diff**
- Figma Section to Block Pattern**
- WP Query Loop Pattern Builder**

Skills Across Platforms: One Pattern, Different Implementations

Commands**

Layer Three: Tool Access with MCP

MCP (Model Context Protocol) is an open-source standard for connecting AI applications to external systems.

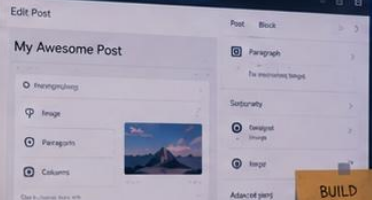

Without tools, agents can only suggest. With tools, agents can execute.

WITHOUT TOOLS
I CAN ONLY CHAT. 😞

I can explain things.
I can write code.
I can suggest ideas.
But I can't **do** anything
in the real world.

NO ACCESS. NO EXECUTION.

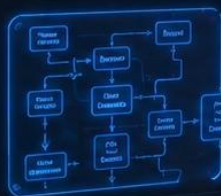

WORDPRESS BLOCK EDITOR

BUILD
SMARTER.
NOT HARDER. ❤️

What Changes Inside a Company

- **WordPress patterns become reusable**
- **Dev ramp-up improves**
- **PMs get more predictable tickets**
- **Repetitive PR documentation gets automated**
- **Design implementation starts faster**

THE REAL SUPERPOWER IS STRUCTURED AI EXECUTION.

BUILDING BETTER. TOGETHER. ♥
